

QGIS Application - Bug report #17800

[symbol button] No color picker entry in the widget

2018-01-05 12:54 PM - Harrissou Santanna

Status:	Feedback	
Priority:	Normal	
Assignee:		
Category:	Map Composer/Printing	
Affected QGIS version:	master	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:		Resolution:
Crashes QGIS or corrupts data:		Copied to github as #: 25696
Description		
<p>In a layout, right click on a page and select "Page properties..."</p> <p>Expand the background symbol widget (nota: I first thought it was a color widget and that "Configure symbol" and other symbol related labels were wrong)</p> <p>But I think that given all the color related items in the widget, particularly, copy, paste, it should also have the color picker</p>
