Affected QGIS version:	master	**Regression?:**	No	
Operating System:	Ubuntu 17.10	**Easy fix?:**	No	
Pull Request or Patch supplied:	No	**Resolution:**		
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	25699	

Description

This may not be a bug but I thought I'd report it. If I add a layer for digitizing I have two choices for snapping units: Meters and Pixels. I added data in EPSG:2274 and changed my projection to 2274 and I still have two choices - meters and pixels. I know in the "foot" side of the world this might cause some angst.

Ehh.... The "foot" side of the world causes the rest of the world too much angst at the moment too. It's about time we got revenge!

#2 - 2018-01-05 09:14 PM - Randal Hale

I can't disagree with you there. Currently the foot side of the world is causing all sorts of angst with the rest of the world.
