

QGIS Redmine (QGIS bug tracker) - Bug report #17834

Processing Scripts don't preserve utf 8 encoding

2018-01-10 01:18 PM - Christian Metzger

Status:	Closed	
Priority:	Normal	
Assignee:	Christian Metzger	
Category:	Any	
Pull Request or Patch supplied:		
Description		
In QGIS 2.18.15 utf 8 encoding (Lao script) isn't preserved when running a script. The same issue could be confirmed in QGIS 2.14.		

History

#1 - 2018-01-16 06:26 AM - Christian Metzger

- Assignee set to Christian Metzger
- Status changed from Open to Closed
- File ScriptExample.png added

I could find a solution by myself.

1. coding: utf-8
needs to be paste in the first line of the script (edit script)
After saving the modified script utf 8 encoding should be preserved.
