QGIS Application - Bug report #17844
Duplicating Hillshade layer shows wrong style in Layers Panel

2018-01-12 10:57 AM - Johannes Kroeger

Status:	Closed		
Priority:	Normal		
Assignee:			
Category:	Symbology		
Affected QGIS version:	2.18.15	**Regression?:**	No
Operating System:		**Easy fix?:**	No
Pull Request or Patch supplied:		**Resolution:**	
Crashes QGIS or corrupts data:		**Copied to github as #:**	25739

Description

Duplicating a live hillshade layer shows it with a single band gray gradient style in the layers panel, updates correctly once style is changed in any ways.

History
