

QGIS Application - Bug report #17874

No full support of HiDPI on Windows 10

2018-01-17 07:08 AM - Michal Jurewicz

Status:	Feedback	
Priority:	Normal	
Assignee:		
Category:	GUI	
Affected QGIS version:	master	Regression?: No
Operating System:	Windows 10	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution:
Crashes QGIS or corrupts data:	No	Copied to github as #: 25769
Description		
<p>I tried QGIS master on Windows 10 (VM running os MacOS) and I noticed that HiDPI displays are not fully supported. There are a lot of objects which doesn't scale according to system preferences. There are: checkboxes, radial buttons, symbols on layers pane, icons on styling pane, vertex during line editing, height of some bars and etc.</p>		

History

#1 - 2018-02-21 05:01 PM - D M

Can anyone familiar with this issue give an update? My understanding is that support for HiDPI display was going to be included in QGIS 3 -- at the moment this feature does not appear to have been implemented.

#2 - 2018-02-21 08:35 PM - Nyall Dawson

3.0 makes qgis usable on hidpi. There's still a lot of work needed to add polish, both by qgis and the underlying qt libraries.

#3 - 2018-02-21 08:52 PM - D M

I could not see this issue being addressed in the roadmap. Are people keeping track of this? This issue has not being assigned to anyone either. Is the plan to release QGIS 3.0 in 2 days with HiDPI support? Could we have an ETA and assign it this issue to a milestone so that people can prioritise their contributions? The matter of HiDPI display is becoming increasingly important and, on Windows, at least, the QGIS GUI is difficult to navigate at very high resolutions.

#4 - 2018-02-21 09:44 PM - Nyall Dawson

Qgis development does not work that. It's an open source project and development is not dictated by a formal list of priorities.

See <https://nyalldawson.net/2016/08/how-to-effectively-get-things-changed-in-qgis/> for a summary on ways you can get the desired improvements implemented.

#5 - 2019-03-09 04:34 PM - Giovanni Manghi

- Status changed from Open to Feedback

Please check if this issue is still valid on QGIS 3.4.5 or 3.6.
