

QGIS Application - Bug report #17883

Check that all options in QGIS Server tabs are correct

2018-01-18 05:22 AM - Etienne Trimaille

Status:	Feedback	
Priority:	Normal	
Assignee:		
Category:	QGIS Server	
Affected QGIS version:	master	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:	No	Resolution:
Crashes QGIS or corrupts data:	No	Copied to github as #: 25778
Description		
<p>Since the QGIS Server refactoring is done, it would be good to check if all QGIS Server settings in the Layer Panel are still correct and used.</p> <p>I'm referring to the "Legend URL", "Metadata URL" and other fields.</p> <p>Maybe we should add some tooltips, it's not clear if the legend URL will replace the default generated legend in a GetLegendGraphics request.</p> <p>Based on a discussion in Nødebo and in Gitter with Alessandro.</p>
