QGIS Application - Bug report #17896
Info tool rubber band ignores symbol rotation

Crashes QGIS or corrupts data:	No	**Copied to github as #:**	25791

Description

We have a project with rotated symbols (data-defined rotation). In QGIS 2.99, when I click on them using the info tool, the red rubber band is shown wrongly, namely without rotation, so that it does not overlay the symbol itself.

This still worked correctly in QGIS 2.18.

(I'm not sure whether I chose the correct category, please change it if necessary!)
