

QGIS Application - Bug report #17903

Missing cancel (and help) button in the symbol selector dialogs

2018-01-20 07:37 PM - Harrissou Santanna

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	Symbology	
Affected QGIS version:	2.18.15	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:	Yes	Resolution:
Crashes QGIS or corrupts data:	No	Copied to github as #: 25799
Description		
<p>Open vector layer properties --> Style --> Categorized style</p> <p>Do the classification</p> <p>Double-click on a category symbol or the [Change] widget</p> <p>The dialog that opens misses Cancel button (and in master, also the Help button). This is inconsistent with clicking the symbol in the layer tree. Actually instead of using QgsSymbolSelectorDialog as this context requires (show a dialog) the code is using QgsSymbolSelectorWidget (like embedded widgets in the styling panel).</p> <p>This also concerns graduated style and the Edit rule dialog</p> <p>PR at https://github.com/qgis/QGIS/pull/5976/ for categorized and graduated for master</p> <p>See https://github.com/qgis/QGIS/pull/6187 for rule-based</p>

Revision 1c34339b - 2018-04-30 02:23 PM - Harrissou Santanna

Use modal dialog when in properties dialog, allowing to cancel

the process and add help button (fix #17903).

Also fix crash that occurs when pressing ESC button.

and fix doc
