QGIS Application - Feature request #17904
In the layer tree, Clicking an item from a rule-based symbolized layer should offer to edit the rule

Description

Apply a rule-based style to a layer

In the layer tree, click either a symbol or a value: it opens the symbol selector dialog. While this behavior is coherent with graduated or categorized symbology, i wonder if in this case (at least when clicking the value), it should open the "Edit rule" dialog, offering options to edit the rule and the symbol.

I think this was the earlier behavior (since 2.8) as stated in QGIS docs

https://docs.qgis.org/testing/en/docs/user_manual/working_with_vector/vector_properties.html#rule-based-rendering

Affected: 2.18 and master

History

#1 - 2018-02-22 07:44 PM - Giovanni Manghi

- Priority changed from Normal to High

#2 - 2018-09-18 08:41 AM - Nyall Dawson

- Tracker changed from Bug report to Feature request

This has never been normal behaviour - I believe the earlier user manual was referring to the rule based tree, not the layer tree.
