**Description**

If i use any other reference point than top-left in any element when exporting (to image, pdf, etc). The element will be repositioned with the top-left element coordinates at the reference point location, moving the element in the exported file and in the layout. Repeated exports will move the element off the page...

Included example images with layout elements with different reference points, before and after export to pdf.

## Associated revisions

**Revision 936c30be - 2018-01-22 08:18 AM - Nyall Dawson**

Fix layout items with non-top left reference move when exporting

Fixes #17910

## History
