| Description | |
| <p>Hi there!</p> <p>I'm trying to enter a path into the browser's filter of QGIS3 like: "R:\geodata\myfiles", but the browser doesn't navigate to this address. I also tried all kinds of slash escaping and variants "R:\\", "R:\v", "R:/" and "R://". I've also tried all settings (regex etc.) but none come to the expected result.</p> <p>Is this a bug or a missing feature?</p> <p>Best regards, Tobias</p> | |

History

#1 - 2018-01-22 08:17 AM - Nyal Dawson

- Tracker changed from Bug report to Feature request

It's a missing feature.

#2 - 2018-01-22 08:17 AM - Nyal Dawson

- Subject changed from QGIS3: filter as an address bar to allow navigating directly to a user-specified path in browser
