Pull Request or Patch supplied:	Resolution:
Easy fix?: No	Copied to github as #: 25865
Description	
<p>While looking for some old discussion on vertex editor, I found http://osgeo-org.1560.x6.nabble.com/QGIS-Developer-QGIS-3-vertex-editor-problems-td5336971.html in which Regis said about the vertex editor</p> <p><i>The use case I know is more typing z / m values easily than entering XY. X/Y typing is not so difficult using the advanced editor panel (just type "x" then paste the X, "y" then paste) . It requires less mouse clicks for sure than the node editor panel. We maybe could add the z and m SpinBox with z and m shortcuts too there.</i></p> <p>Given that it looks like a good idea to me, here's the feature request...</p>
