

QGIS Application - Bug report #17976

Qgis 2.14 when starting stays in stanby in GUI

2018-01-26 06:48 PM - Marc Teixido Roure

Status: Closed	
Priority: Normal	
Assignee:	
Category: Unknown	
Affected QGIS version: 2.14.20	Regression?: No
Operating System: windows 10 on vmware	Easy fix?: No
Pull Request or Patch supplied: No	Resolution: not reproducible
Crashes QGIS or corrupts data: No	Copied to github as #: 25872
Description	
HI,	
I have a virtual machine with Windows 10 I have installed Qgis 2.14 correctly. With the administrator user it works correctly, but with a normal user it remains configuring the graphical user interface (GUI).	
Attachment screenshot.	
Regards

Can you please try with QGIS 2.18?

2.14 won't get a patch anymore. Only 2.18 and 3.0 when it will be out in February:

<https://www.qgis.org/de/site/getinvolved/development/roadmap.html#release-schedule>

Yes, I have tested version 2.18 but it repeats the error

#3 - 2018-02-08 09:07 PM - Richard Duivenvoorde

I cannot confirm here.

I have a Win10 VM (on KVM, but that should not be a problem I think), with a user admin which installed qgis and runs it.

Then I create a user 'user' with only standard rights, and then I can just start QGIS and run it.

I can even start qgis in osgeo shell like: 'qgis --configpath c:\temp\config'

Are you sure it is not a Windows Permission problem? Or maybe a virusscanner you set up?

with permission of administrator, it shows this message "The plugin will be disabled because it crashed QGIS during last startup. Please report an issue

and re-enable the plugin when the problem has been solved.”

please update and try again.

#7 - 2018-08-25 04:33 PM - Giovanni Manghi

- Resolution set to not reproducible

- Status changed from Feedback to Closed

Closing for lack of feedback.
