

QGIS Application - Bug report #17986

Field Filter bug in Attribute Table when field is a Value Map

2018-01-29 03:05 AM - Kory Roberts

Status: Closed	
Priority: Normal	
Assignee: Nyall Dawson	
Category: Attribute table	
Affected QGIS version: master	Regression?: Yes
Operating System: Linux Mint 18.3 Cinnamon	Easy fix?: No
Pull Request or Patch supplied: No	Resolution: fixed/implemented
Crashes QGIS or corrupts data: No	Copied to github as #: 25882
Description	
Say the Value Map for a field is set to 'A', 'B', 'C'. When the Field Filter is selected in the Attribute Table for that field, the drop down choice is literally the word "map" and that's it...no A/B/C.

Applied in changeset commit:qgis|234bc1a47253d90769218896193491ccd206c5d9.

#4 - 2018-01-31 02:13 AM - Kory Roberts

Installed the latest build of QGIS. Working now. BUT why isn't <NULL> a selection choice if set in the value map? That's actually the "value" I need to

filter for.

#5 - 2018-02-01 02:34 AM - Nyal Dawson

There was another related bug. Note that filtering for null/not null is only available in the full filter form view - press the "select/filter features using form" button on the attribute table toolbar to access.

#6 - 2018-02-01 02:45 AM - Kory Roberts

If that's the case, I don't think it's working (unless later correction of related bug fixed this, too).

Select/filter features using form -> select Is missing (null) for field with value map -> Select features|Filter features ... nothing happens.

#7 - 2018-02-01 03:08 AM - Nyal Dawson

You'll need a build with that most recent fix

#8 - 2018-02-21 09:29 PM - Giovanni Manghi

- *Resolution set to fixed/implemented*
