

QGIS Application - Feature request #17988

Give better feedback to user when multiple records are updated via, for example, Update Selected in Attribute Table

2018-01-29 03:54 AM - Kory Roberts

Pull Request or Patch supplied:	Resolution:
Easy fix?: No	Copied to github as #: 25884
Description	
<p>The kind of thing I'm thinking is after records are updated...</p> <ul style="list-style-type: none">- Flash cells that have changed in the Attribute Table, say 5 seconds or something.- Flash geometries on the main map (like the already existing "Flash feature"), say 5 seconds or something.- Display in the main window an updated status message.- Display in the Attribute Table some status message (in title bar?) indicating how many records were last updated. <p>Basically just better feedback to the user that the changes intended were actually the changes that happened.</p>
