<b>Pull Request or Patch supplied:</b>	<b>Resolution:</b>
<b>Easy fix?:</b> No	<b>Copied to github as #:</b> 25891
<b>Description</b>	
<p>This is a request for option to choose which angle units (and distance units also) are used in the Advanced Digitizing tools panel. This request relates to my previous question ( <a href="https://gis.stackexchange.com/questions/269330/advanced-digitizing-panel-angle-units/269544#269544">https://gis.stackexchange.com/questions/269330/advanced-digitizing-panel-angle-units/269544#269544</a> ) where I try to define my problem.</p> <p>In short, I'd like to have an option to choose which units the Advanced Digitizing tools panel use (angle = degrees, Gons, Radians etc.) (distance = meters, kilometers, yards etc)</p> <p>At current state it is only possible to change the measurement toolbox units through settings, but not the units for Advanced digitizing tools. Tested with 2.18.6, 2.99 (nightly)</p>

Hi,

I'm +1.

For a near subject, we started discussing it [here](#)
