Hi, this is probably because you have some (processing) leftovers in hour ~/.qgis2 (or Windows counterpart of it).

If you remove or rename the .qgis2 directory (or maybe just remove the processing directory in it???). Your install will be ok.

Seen this yesterday at a meeting :-)

- Status changed from Open to Closed

I have renamed .qgis2 directory, removing the processing directory was not enough.

I had to reinstall the all plugin.

Thank you.
