<b>Easy fix?:</b>	No	
<b>Description</b>		
<p>Currently the processing "history" window is modal, so you can't leave it open to refer to while you are using processing algorithms.</p> <p>It would be much better if it was modeless, e.g. so you can use it to compare with the settings you used previously for an algorithm.</p> <p>The only reason I can think of for this window to be modal is to avoid the difficulty of updating it whenever an algorithm is run.</p>
