

QGIS Application - Bug report #18093

QGIS 2.18.16 Freezes when clicking on start editing without a vector selected in TOC

2018-02-13 05:35 PM - Antonio Viscomi

Status: Closed	
Priority: Normal	
Assignee:	
Category: GUI	
Affected QGIS version: 2.18.16	Regression?: No
Operating System: Windows 7 x64	Easy fix?: No
Pull Request or Patch supplied: No	Resolution: worksforme
Crashes QGIS or corrupts data: No	Copied to github as #: 25989
Description	
Hi All, I noticed that if you click start editing, without having first selected a vector layer in the TOC, QGIS freezes for which you have to turn off the program and restart it

*Hi All,
I noticed that if you click start editing, without having first selected a vector layer in the TOC, QGIS freezes for which you have to turn off the program and restart it*

Obviously the start editing icon is not gray, but in the TOC the selection of the layer is not displayed in this circumstance

Obviously the start editing icon is not gray, but in the TOC the selection of the layer is not displayed in this circumstance

This bug happens when the editing is deactivated from the table after the modification ... the selection in the GUI disappears but the icon remains active
I attach a screenshot in which it appear the start editing icon active without selection of any layer in TOC
