

QGIS Application - Bug report #18102

Can only input integer value in the vertex editor

2018-02-14 02:14 PM - Loïc BARTOLETTI

Status: Closed	
Priority: Normal	
Assignee: Alessandro Pasotti	
Category: Digitising	
Affected QGIS version: master	Regression?: Yes
Operating System: Windows	Easy fix?: No
Pull Request or Patch applied: Yes	Resolution:
Crashes QGIS or corrupts data: No	Copied to github as #: 25998
Description	
<p>With a FR locale, it is impossible to enter coordinates with a point as a decimal separator (well). But when you enter a value with a decimal, using the comma (FR numeric), it sets the cell to 0. It is only possible to enter integers.</p> <p>It is also possible to enter spaces but this also sets the cell to 0.</p>

[bugfix] Fixes float input in advanced digitizing ...

... with not-dot locales

Fixes #18102 - Can only input integer value in the vertex editor

Precision is hardcoded to 6 decimal places, we can either increase it or make it configurable.

- *Assignee* changed from Martin Dobias to Alessandro Pasotti

Let me know if this is still an issue in current master, and in which O.S. (I've seen this problem before but only on windows).

#5 - 2018-09-17 02:57 PM - Loïc BARTOLETTI

Tested on Windows, it's works.

But For example i have "1234,456". editing the node show me "1234.456" if I change to "1234.789" doesn't works. I need to remove the dot to a comma "1234,789". A comma is normal, but the editor should be already with a comma not a dot.

Thanks

Thanks for checking, I'll have a look. What is your operating system?

#7 - 2018-09-17 03:12 PM - Loïc BARTOLETTI

Tested on windows 10 and FreeBSD 12

#8 - 2018-09-17 03:40 PM - Alessandro Pasotti

Fixed, but I'd like to get a decent precision: do you know if is there a setting for precision? How many decimal places should we show here?
