

QGIS Application - Feature request #1813
Support for WFS with NTLM authentication

2009-07-28 06:43 AM - Markus Neteler

Status:	Open	
Priority:	Low	
Assignee:	Marco Hugentobler	
Category:	Web Services clients/WMS	
Pull Request or Patch supplied:		Resolution:
Easy fix?:	No	Copied to github as #: 11873
Description		
<p>Currently, QGIS seems to be unable to connect to WFS servers with NTLM authentication.</p> <p>We have discovered that the Mapserver project has already implemented such support some time ago. Here the patch with might be helpful for a similar implementation in QGIS:</p> <p>http://trac.osgeo.org/mapserver/ticket/571</p> <p>Our WFS server address for testing (we can offer the user/password to test an implementation in QGIS if needed):</p> <p>http://sit.geographics.eu/arcgis/services/CREV/WFS_1/MapServer/WFSServer</p> <p>Best regards, Markus</p>
