QGIS Application - Bug report #18140
Wrong color is exported

2018-02-19 10:36 AM - Julian Wiechmann

Status:	Closed			
Priority:	High			
Assignee:				
Category:	Unknown			
Affected QGIS version:	2.18.0		**Regression?:**	No
Operating System:			**Easy fix?:**	No
Pull Request or Patch supplied:			**Resolution:**	not reproducable
Crashes QGIS or corrupts data:			**Copied to github as #:**	26033

Description

The color green is incorrectly reproduced while exporting a pdf. After the second time I overwrite a pdf the green colours will be incorrectly reproduced. With this bug I can not go on with my work.

I hope for a quick solution

History

I doubt that this has anything to do qith QGIS itself, AFAIK the conversion to PDF is handled by the underlying Qt libraries.

If you can share a test project we can try to reprouce it.
