

QGIS Application - Bug report #18147

[Processing Modeler] Clicking algorithm Help button from within Processing modeler fails to find the right page

2018-02-19 02:30 PM - Harrissou Santanna

Status: Closed	
Priority: Normal	
Assignee: Yves Jacolin	
Category: Documentation and Help	
Affected QGIS version: master	Regression?: No
Operating System:	Easy fix?: No
Pull Request or Patch supplied:	Resolution: fixed/implemented
Crashes QGIS or corrupts data:	Copied to github as #: 26040
Description	
Open the Processing modeler dialog Double-click any algorithm From the alg dialog, click the Help button: 404 NOT FOUND The same alg from the Processing toolbox would/should have opened the right documentation page Giving a look to the constructed URL, there's a missing "#" character after "html" to get the anchor, hence the "unfound" page (ie, https://docs.qgis.org/testing/en/docs/user_manual/processing_algs/qgis/cartography.htmltopological-coloring instead of https://docs.qgis.org/testing/en/docs/user_manual/processing_algs/qgis/cartography.html#topological-coloring).
