

QGIS Application - Bug report #18154

Fix anchor in Documentation for Processing

2018-02-20 09:58 AM - matteo ghetta

Status: Closed	
Priority: Normal	
Assignee: Yves Jacolin	
Category: Documentation and Help	
Affected QGIS version: master	Regression?: No
Operating System:	Easy fix?: No
Pull Request or Patch supplied:	Resolution: fixed/implemented
Crashes QGIS or corrupts data:	Copied to github as #: 26047
Description	
As discussed in dev mailing list here: https://lists.osgeo.org/pipermail/qgis-developer/2018-February/052193.html a fix on sphinx side is required to match the algorithm anchors with the algorithmName in the code.	

History

#1 - 2018-02-23 05:16 PM - matteo ghetta

- Resolution set to fixed/implemented

using an anchor with the **same** name of the algorithm in the code (e.g. ``.. _splitwithlines``) solves the issue.

#2 - 2018-02-24 01:39 PM - matteo ghetta

- Status changed from Open to Closed
