

## QGIS Application - Bug report #18194

### QGIS3 Processing Graphical Modeler GUI is messed up on OSX

2018-02-23 03:18 PM - asgerpetersen -

<b>Status:</b> Closed	
<b>Priority:</b> High	
<b>Assignee:</b> Victor Olaya	
<b>Category:</b> Processing/Modeller	
<b>Affected QGIS version:</b> 3.0.0	<b>Regression?:</b> Yes
<b>Operating System:</b> OSX High Sierra	<b>Easy fix?:</b> No
<b>Pull Request or Patch supplied:</b> No	<b>Resolution:</b> fixed/implemented
<b>Crashes QGIS or corrupts data:</b> No	<b>Copied to github as #:</b> 26085
<b>Description</b>	
<p>The GUI for the graphical modeller is so messed up on OSX that it is not usable. Please see the attached screenshot.</p> <p>My version of QGIS is compiled using <a href="https://github.com/qgis/homebrew-qgisdev">https://github.com/qgis/homebrew-qgisdev</a>.</p> <p>Latest commit is commit:70c68df72a which is a few minutes after branching off QGIS 3.0.</p> <p>Also see attached screen dump of "About QGIS" for Qt versions etc.</p> <p>Other parts of this QGIS build seem to work as expected.</p>	

#### History

##### #1 - 2018-02-24 12:51 AM - Nyal Dawson

- Resolution set to fixed/implemented
- Status changed from Open to Closed

This is fixed in the code, but you'll need to manually uninstall the qgis qt custom widgets.

##### #2 - 2018-02-25 11:29 PM - Alister Hood

Translation based on #18065: "delete qgis\_customwidgets.py"

##### #3 - 2018-03-12 08:41 PM - Jürgen Fischer

- Description updated

##### #4 - 2018-03-15 09:13 PM - Daniel Victoria

I'm seeing that this issue is closed. But I'm having the same problem in QGIS 3.0.0 - Girona, running on Ubuntu 16.04 installed from the <http://qgis.org/ubuntuqgis> repository. Any idea when the fix will make it to the debian / ubuntu packages in the repository?
