

QGIS Application - Bug report #18198

Gdal Help button in Processing gives annoying error

2018-02-23 05:20 PM - matteo ghetta

Status:	Closed	
Priority:	Normal	
Assignee:	Alexander Bruy	
Category:	Processing/GDAL	
Affected QGIS version:	master	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:		Resolution:
Crashes QGIS or corrupts data:		Copied to github as #: 26089
Description		
<p>When hitting the Help button in Processing doc dialog for GDAL algorithms an annoying Stack Trace pops up, e.g.:</p> <p>AttributeError: 'aspect' object has no attribute 'outputs'</p> <p>Traceback (most recent call last):</p> <p>File "/home/matteo/lavori/QGIS/build-qgis3/output/python/plugins/processing/algs/gdal/GdalAlgorithm.py", line 132, in helpUrl</p> <p>return helpPath + '{}.html'.format(self.commandName())</p> <p>File "/home/matteo/lavori/QGIS/build-qgis3/output/python/plugins/processing/algs/gdal/GdalAlgorithm.py", line 136, in commandName</p> <p>for output in self.outputs:</p> <p>AttributeError: 'aspect' object has no attribute 'outputs'</p>		

History

Not sure is self.outputs is still used? A small 'if' in front of it fixes the exception, but maybe it can just be removed?

I fixed the redirect on the doc server that 3.1 actually goes to testing.
