

QGIS Application - Bug report #18198

Gdal Help button in Processing gives annoying error

2018-02-23 05:20 PM - matteo ghetta

Status: Closed	
Priority: Normal	
Assignee: Alexander Bruy	
Category: Processing/GDAL	
Affected QGIS version: master	Regression?: No
Operating System:	Easy fix?: No
Pull Request or Patch supplied:	Resolution:
Crashes QGIS or corrupts data:	Copied to github as #: 26089
Description	
<p>When hitting the Help button in Processing doc dialog for GDAL algorithms an annoying Stack Trace pops up, e.g.:</p> <pre>AttributeError: 'aspect' object has no attribute 'outputs'</pre> <p>Traceback (most recent call last): File "/home/matteo/lavori/QGIS/build-qgis3/output/python/plugins/processing/algs/gdal/GdalAlgorithm.py", line 132, in helpUrl return helpPath + '{}.html'.format(self.commandName()) File "/home/matteo/lavori/QGIS/build-qgis3/output/python/plugins/processing/algs/gdal/GdalAlgorithm.py", line 136, in commandName for output in self.outputs: AttributeError: 'aspect' object has no attribute 'outputs'</p>	

History

Not sure if self.outputs is still used? A small 'if' in front of it fixes the exception, but maybe it can just be removed?

I fixed the redirect on the doc server that 3.1 actually goes to testing.
