QGIS Application - Bug report #1821
Coordinate Capture: Three first digits of X cut

2009-07-31 01:56 AM - alobo -

Status:	Closed			
Priority:	Low			
Assignee:	Borys Jurgiel			
Category:	Python plugins			
Affected QGIS version:		**Regression?:**	No	
Operating System:	Linux	**Easy fix?:**	No	
Pull Request or Patch supplied:		**Resolution:**	invalid	
Crashes QGIS or corrupts data:		**Copied to github as #:**	11881	

Description

1. The 3 first digits of the X (projected) coordinate
are not displayed, but the saved to clipboard coordinates are correct
2. Projected Coordinates are not identical to the ones
reported in the main window
See attached screenshot

Sorry,
"2. Projected Coordinates are not identical to the ones reported in the main window"
is not true.
Please ignore

Hi,

it works fine for me under qgis 1.2 from trunk. Can you please attach some data in order try replicate the problem?

#3 - 2009-07-31 11:53 PM - alobo -

- Resolution set to invalid

- Status changed from Open to Closed

Please have a look at the attached jpg (right side).
Solved just by enlarging the coordinate capture window, which is too narrow
for all digits being displayed
in the default settings (docked in the left side panel)
The Coordinate Capture window must be enlarged to show all digits
of the projected coordinates, but then gets too wide for being docked in the panel.
5 decimal digits is far too much for UTM coordinates.

Anyway, this is clearly a minor issue, perhaps a note should be included in the

User guide and/or not docking this window by default.

I'm closing the ticket as invalid. Thanks.
