

QGIS Application - Bug report #18223

Review the Subdivide algorithm help: advertised bug?

2018-02-26 12:15 PM - Harrissou Santanna

Status:	Open	
Priority:	Normal	
Assignee:	Victor Olaya	
Category:	Processing/QGIS	
Affected QGIS version:	3.0.0	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:		Resolution:
Crashes QGIS or corrupts data:		Copied to github as #: 26114
Description		
<p>The subdivide algorithm help (in app and in docs) states that</p> <div><p><i>The returned geometry parts may not be valid and may contain self-intersections.</i></p></div> <p>I'm not sure this comment adds confidence in the tool. Shouldn't creation of invalid features be considered as a bug and fixed in the tool instead?</p>
