

QGIS Application - Bug report #18286 cannot filter by \$geometry, \$length, \$area etc.

2018-03-01 11:52 AM - Mattias Spangmyr

Status: Closed	
Priority: High	
Assignee: Hugo Mercier	
Category: Attribute table	
Affected QGIS version: 3.3(master)	Regression?: Yes
Operating System:	Easy fix?: No
Pull Request or Patch applied: Yes	Resolution:
Crashes QGIS or corrupts data: No	Copied to github as #: 26177
Description	
<p>The "Advanced Filter (Expression)" function of the Attribute Table does not seem to be able to filter by comparing the current feature's geometry (\$geometry) to NULL.</p> <p>Applying either of the following expressions filters nothing:</p> <ul style="list-style-type: none">- \$geometry IS NULL- \$geometry IS NOT NULL <p>Both of the above expressions work when using "Select features using an expression", so its still possible to find null geometries that way.</p>

I tested in QGIS 3.0.0 just now and the behaviour is exactly the same as far as I can see. However, I need to revise my description as the expression "\$geometry IS NOT NULL" actually does filter, only it does not show any features either with or without geometry.

My version (on Win 7 64-bit):

QGIS version 3.0.0-Girona QGIS code revision 001c80b0c3
Compiled against Qt 5.9.2 Running against Qt 5.9.2
Compiled against GDAL/OGR 2.2.3 Running against GDAL/OGR 2.2.3
Compiled against GEOS 3.5.0-CAPI-1.9.0 Running against GEOS 3.5.0-CAPI-1.9.0 r4084
PostgreSQL Client Version 9.2.4 SpatiaLite Version 4.3.0
QWT Version 6.1.3 QScintilla2 Version 2.10.1
PROJ.4 Version 493

- Subject changed from *Advanced Filter (Expression) unable to filter by \$geometry IS NULL to Advanced Filter (Expression) in attribute table unable to filter by \$geometry IS NULL*

- Affected QGIS version changed from 2.18.16 to 3.0.0

- Operating System deleted (Windows 7)

#4 - 2018-10-15 09:34 AM - Tudor Bărăscu

Just filling out a bug report when I noticed this one.

Filtering a line or polygon layer by \$length or \$area doesn't work:

Steps to reproduce:

- Open attribute table

- Select Advanced Filter (Expression)

- Create a simple expression: length bigger than 10 meters (for my case): \$length > 10

- I noticed that in the Output preview window I get 0 or 1 (True or False) but in the attribute table all the rows disappear (making the expression \$length <= 10 does the same)

Tested on QGIS Master (3.3) and 2.18

@Giovanni Maybe the issue name should be changed to "cannot filter by \$geometry, \$length, \$area etc.

#5 - 2018-10-15 09:52 AM - Giovanni Manghi

- Subject changed from *Advanced Filter (Expression) in attribute table unable to filter by \$geometry IS NULL to cannot filter by \$geometry, \$length, \$area etc.*

- Affected QGIS version changed from 3.0.0 to 3.3(master)

#6 - 2018-10-22 01:38 PM - Tudor Bărăscu

- File *atr_bug.jpg* added

@Giovanni I think this issue should have a High priority as I discovered more problems (consequences) tied to it.

For example, any form constraints that use the geometry in any way work well in feature forms but are not working as expected in the attribute table.

I've attached a screenshot.

For the same feature, the "single" form passes the constraints whereas the same form in the attribute table doesn't so the editors are not guided well from the attribute table.

I assume this is a regression(?).

#8 - 2018-10-24 09:18 AM - Hugo Mercier

- Assignee set to Hugo Mercier

Confirmed.

When tested with a shapefile, "\$" fields do not work. However, when trying with a memory layer it works.

#9 - 2018-10-24 09:22 AM - Nyal Dawson

This is because attribute table doesn't fetch geometries (for performance reasons).

#10 - 2018-10-24 09:31 AM - Hugo Mercier

Hmmm, apparently the filter can fetch geometries when needed (this is what I observe with memory layers)
