<b>Easy fix?:</b> No	<b>Copied to github as #:</b> 26211
<b>Description</b>	
<p>The right-click option to group selected layers is only available if two or more layers are selected. I often wish that it was there also for a single selected layer, that will be the first layer in a new group, or I want to the group to be where that single layer is and then drag other layers into the group.</p>
