QGIS Application - Bug report #18325
Feature form is not remmebering last configuration

2018-03-04 09:23 AM - Dan Isaacs

Status:	Closed			
Priority:	High			
Assignee:				
Category:	GUI			
Affected QGIS version:	3.0.0		**Regression?:**	Yes
Operating System:			**Easy fix?:**	No
Pull Request or Patch supplied:			**Resolution:**	fixed/implemented
Crashes QGIS or corrupts data:			**Copied to github as #:**	26215

Description

In Previous versions, the feature form that pops up with the information tool or new feature creation would remember the previous size and position. In Qgis 3 it no longer seems to. This is a retrograde step as it makes the whole ability to lay out the feature form in columns and sub-groups pointless as they end up off screen.

History

#1 - 2018-03-04 10:11 AM - Giovanni Manghi

- Easy fix? changed from Yes to No

- Category changed from Forms to GUI

- Priority changed from Normal to High

#2 - 2018-03-05 04:28 PM - Francisco Pérez Sampayo

Actually, qgis3 remember the size and position at feature level. Maybe it could be better at layer level?

Yes, I have a file with several hundred features and to set them all to the size I need them is unnecessarily onerous. I can't really see the value in having them set by feature as the default.

#4 - 2018-04-19 01:58 PM - Nyall Dawson

- Resolution set to fixed/implemented

- Status changed from Open to Closed

That's already fixed in 3.0.1
