| <b>Description</b><br><br>Then export layer (report) we may see that image is layered.<br>Need multilayered PDF or GEOTIFF.<br>It's usefull for distribute map materials with or without additional inforamtion: borders, points of tears, some layers contained sensitive info and etc.<br>This feature could be usefull then you need hide info (by Photoshop/GIMP turn on/off or delete layer (delete in the copy)), but you need have this info in file. |                       |                                     |
