Pull Request or Patch Supplied:	Resolution:
Easy fix?: No	Copied to github as #: 26240
Description	
<p>Then export layer (report) we may see that image is layered. Need multilayered PDF or GEOTIFF. It's usefull for distribute map materials with or without additional inforamtion: borders, points of tears, some layers contained sensitive info and etc. This feature could be usefull then you need hide info (by Photoshop/GIMP turn on/off or delete layer (delete in the copy)), but you need have this info in file.</p>
