

QGIS Application - Bug report #18405

CRS selector does not close

2018-03-10 02:10 PM - Gavin Fleming

Status:	Closed		
Priority:	High		
Assignee:			
Category:	Projection Support		
Affected QGIS version:	3.0.0	Regression?:	Yes
Operating System:	Ubuntu 16.04	Easy fix?:	No
Pull Request or Patch supplied:	No	Resolution:	
Crashes QGIS or corrupts data:	No	Copied to github as #:	26295
Description			
Blocker:			
I loaded a layer with an unrecognised CRS (unrecognised possibly because of #18404; even though it is a GeoTIFF with a header and prj file specifying that it is EPSG:4326)			
So the CRS selector pops up, there's no suitable CRS to select and no matter what I try I can't close the CRS selector so I have to kill QGIS.

There's not enough detail here to reproduce/fix. Can you still trigger this error?

#3 - 2018-09-20 11:23 AM - Gavin Fleming

- Status changed from Feedback to Closed

can't replicate anymore after OS and QGIS upgrades
