QGIS Application - Bug report #18426
Form size/location is only remembered for each feature

2018-03-13 05:20 AM - Damien Smith

Status:	Closed

Affected QGIS version:	3.1(master)		**Regression?:**	No
Operating System:	Windows 10		**Easy fix?:**	No
Pull Request or Patch supplied:	Yes		**Resolution:**	
Crashes QGIS or corrupts data:	No		**Copied to github as #:**	26315

Description

In QGIS 3.X, when doing data entry, the form size and location is reset for every new feature and only remembered for a single feature. This makes data entry very cumbersome particularly for multiple monitors or larger forms. If this is not a bug and people want this behaviour, it should be disabled by default and only available by an option.

e.g.

Remember form settings by -:
Layer or Feature

Revision bf124046 - 2018-03-16 02:01 AM - Nyall Dawson

Revert 5b9be7a

Since the attribute table dialog object name is set to match
the layer/featureid combo, this commit was causing the attribute
form dialog to remember its position and size for each
feature/layer combo individually.

That's NOT what we want!

Fixes #18426

Revision 7521a82a - 2018-03-16 03:43 AM - Nyall Dawson

Revert 5b9be7a

Since the attribute table dialog object name is set to match
the layer/featureid combo, this commit was causing the attribute
form dialog to remember its position and size for each
feature/layer combo individually.

That's NOT what we want!
