

QGIS Application - Feature request #18459

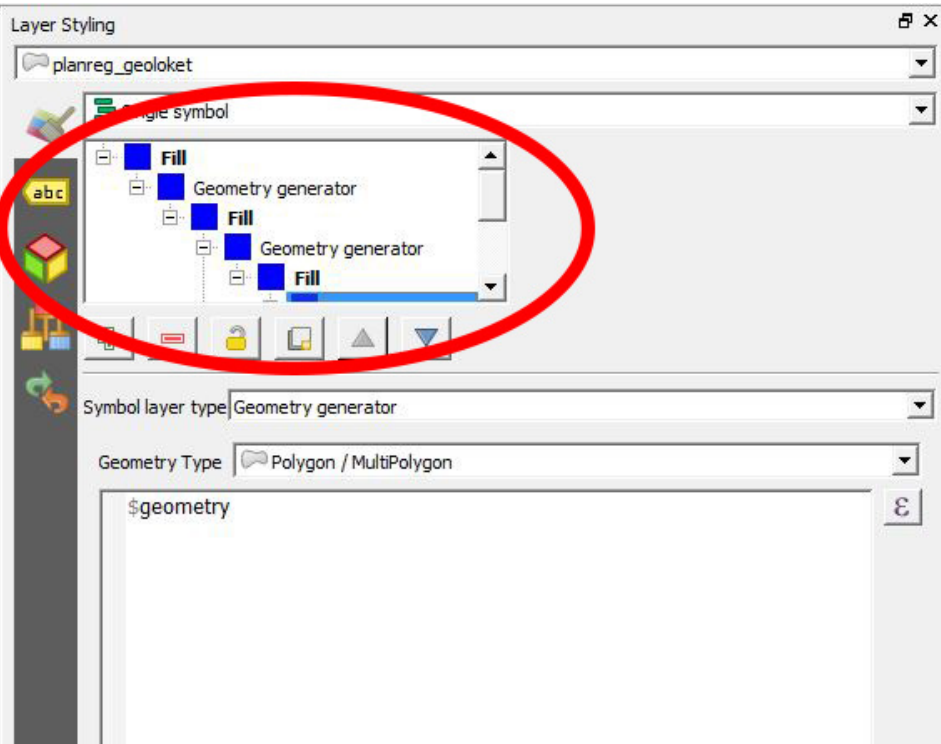

Make the Symbol Layers List resizable

2018-03-16 12:45 PM - Michel Stuyts

Status:	Open	Resolution: Copied to github as #: 26347
Priority:	Normal	
Assignee:		
Category:	GUI	
Pull Request or Patch supplied:	No	
Easy fix?:	No	

Description

When you use multiple Symbol Layers to style a layer, the Symbol Layers List area in the Layer Styling Panel and Layer Properties window is too small to have good overview of the build up structure of Symbol Layers. With the use of multiple Geometry Generators you have many Symbol Layers. It would be good to be able to resize this Symbol Layers List area.
