QGIS Application - Bug report #18474
Layer style effects not supported by the legend

2018-03-18 02:06 PM - Borys Jurgiel

Status:	Open			
Priority:	High			
Assignee:				
Category:	Map Legend			
Affected QGIS version:	3.1(master)		**Regression?:**	No
Operating System:			**Easy fix?:**	No
Pull Request or Patch supplied:			**Resolution:**	
Crashes QGIS or corrupts data:	No		**Copied to github as #:**	26362

Description

They are included neither to the Layers panel nor to the printed legend.

Also they cause a "Warning: Unsupported blend" debug message.

History

#1 - 2018-03-18 02:16 PM - Borys Jurgiel

- Priority changed from Normal to High

Setting priority to high, as it badly limits usefulness of the effects in printouts.

#2 - 2018-03-18 09:59 PM - Nyall Dawson

I'm against including them in legends until we gain support for customising the legend symbol within a legend. E.g. there needs to be a way to turn them off when they aren't wanted in a legend.
