Crashes QGIS or corrupts data:	No	**Copied to github as #:**	26379	

Description

If you have set the rotation of the canvas to bigger than 90 degress and then try to save map as image file then QGIS will generate wrong word file - the fourth value has double '-' at the beginning. Sample:

-0.01847046396465634
1.05817217183748857
1.05817217183748857

Can you please confirm whether the correct line should be:

"0.01847046396465634"

or

"-0.01847046396465634"?

As we have checked, the correct values should be:

-0.01847046396465634
1.05817217183748857
1.05817217183748857
0.01847046396465634
-1695664.99200768675655127
9425646.86312681064009666

So the double '-' should disappear.
