#### Description

When using the default temporary output filename for an output map layer or an output file (i.e. "[Save to temporary file]") the generated path includes ":" characters, which is not valid for Windows systems. E.g.

```
'C:/Users/janzandr/AppData/Local/Temp/processing_89e228ee564d43abb20c34f42030b6d4/4c8c4979b2a84b8a8787c0750439ad0a/gis:createconstantrasterlayer_1:outraster.tif'
```
