

QGIS Application - Bug report #18504

Qgis crash when info over geometry was cliccked

2018-03-21 02:30 PM - Gerardo Aliberti

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	C++ Plugins	
Affected QGIS version:	3.0.0	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:		Resolution:
Crashes QGIS or corrupts data:		Copied to github as #: 26392

QgsSvgCache fetches remote SVG files in a background task

Previously QgsSvgCache would often try to fetch remote images using a network request on the main thread, by calling processEvents repeatedly until the request was complete.

This caused lots of bugs, since the main thread processEvents would proceed with all kinds of stuff assuming that the svg fetch operation was complete, leading to frequent crashes and deadlocks and making remote svg use impossible (it's likely that the SVG cache remote fetching code was written in the pre-multi-threaded rendering era).

There's no way to fix this with async svg fetching - we HAVE to remove the processEvents call, and a QEventLoop won't help either (since the method may be called on the main thread). Accordingly the only solution is to fetch the requested svg in the background, and return a temporary "downloading" svg for use in the meantime. We use a QgsNetworkContentFetcherTask to do this, so it's nicely integrated with task manager.

A request task is fired up when a remote svg is requested for the first time, with the temporary downloading svg returned for use by the caller asynchronously. QgsSvgCache

then emits the remoteSvgFetched signal when a previously requested remote SVG has been successfully fetched, triggering a map canvas redraw with the correct SVG graphic.

Fixes #18504

## **History**

---

### **#1 - 2018-03-21 06:35 PM - Gerardo Aliberti**

Issue happens if the style/symbology icon of the layer points to an non local path (es. <http://myurl/milcon.svg>)

### **#2 - 2018-03-29 12:46 AM - Nyall Dawson**

- Status changed from Open to In Progress

**#3 - 2018-04-09 04:42 AM - Nyal Dawson**

- % Done changed from 0 to 100

- Status changed from In Progress to Closed

Applied in changeset commit:qgis|45c400c25c128061923b0aded682557653ad1c6a.
