

QGIS Application - Bug report #18509
XYZ-Layer "Network time out"

2018-03-22 09:10 AM - Thomas Ramm

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	Web Services clients/XYZ	
Affected QGIS version:	3.0.0	Regression?: Yes
Operating System:	Windows 10	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: no timely feedback
Crashes QGIS or corrupts data:	No	Copied to github as #: 26397
Description		
<p>Hello,</p> <p>we have our own TMS Server within our company. QGIS 3 can't load any tiles from this server. i have also QGIS 2.18 installed, there i can open the tiles from our Server.</p> <p>I get only the Network error "" if i copy'n past the url i can open the tiles in the browser. So there is no misstyping in the url.</p> <p>Any Ideas what is different to QGIS 2.18 code?</p> <p>We have no access to the internet, only OSM is allowed.</p> <p>I test it with ProxyServer enabled (for OSM) and disabled. The internal Server doesn't need any proxy but i have no other idea to test some other changes than TimeOut and Proxy.</p> <p>So I also set the timeout to a higher time.</p> <p>example message: 2018-03-22T09:06:07 WARNING Network request https://tms.manserv.net/tiles/10/536/339.png?o=56&#38;l=de timed out</p> <p>Connections to OSM Tile Server working in QGIS 3</p>

- Status changed from Open to Feedback

Without a publicly available endpoint that we can actually test it will be very difficult to help.

Did you check for any SSL related error btw?
