<b>Description</b>		
<p>In the Layout panel, Variables, Layout, it looks like variables are set once and all.</p> <p>In the attached screenshot, none of the variables shown in the panel (dpi, name, numpages,height and width - for the last ones, I don't know what it should be given the two sizes of pages) is right while they are up to date in the label item.</p> <p>I refreshed the dialog multiple times.</p>
