QGIS Application - Bug report #18572

ggis doesn't save features added to a layer when source fields are deleted for a second time

2018-03-29 11:10 AM - A B

Status: Open Priority: Normal

Affected QGIS version:3.0.0Regression?:NoOperating System:Easy fix?:No

Pull Request or Patch shapplied: Resolution:

Crashes QGIS or corrupts data: Copied to github as #: 26460

Description

see the video - after creation of layer, I've added features and successfully saved them, yet when repeating the workflow, features are not saved (lost forever - no change in filesize)

why do I do it this way? I want to draw the points quickly - without being forced to enter attributes for every single feature tested on 3.0.0 and 2.14.9
