

QGIS Application - Bug report #1862

layer editing icon doesn't show on layers loaded from a project

2009-08-06 06:33 PM - Steven Mizuno

<b>Status:</b>	Closed	
<b>Priority:</b>	Low	
<b>Assignee:</b>	nobody -	
<b>Category:</b>	Map Legend	
<b>Affected QGIS version:</b>		<b>Regression?:</b> No
<b>Operating System:</b>	Windows	<b>Easy fix?:</b> No
<b>Pull Request or Patch supplied:</b>		<b>Resolution:</b> duplicate
<b>Crashes QGIS or corrupts data:</b>		<b>Copied to github as #:</b> 11922
<b>Description</b>		
<p>For items on Layers panel: with the recent return of indicating that a layer is being edited, which works on layers added to a project, editing is not indicated for layers loaded from a project file.</p> <p>Also, the layer items bounce a bit because the edit icon is a different size from the layer type icon, which is a minor annoyance. Perhaps the editing icon could be overlaid on the type icon, which is how it used to be.</p> <p>These were observed on Windows XP, but I believe all platforms are affected.</p>

Hi,

this is duplicate of #1760, that I confirmed under Linux, so now we know it is a issue on probably all platforms.
