

QGIS Application - Bug report #18620

Layer rendering order broken in QGIS 3x

2018-04-04 11:42 AM - Andreas Neumann

Status: Closed	
Priority: High	
Assignee: Alessandro Pasotti	
Category: Symbology	
Affected QGIS version: 3.1(master)	Regression?: Yes
Operating System:	Easy fix?: Yes
Pull Request or Patch Applied: Yes	Resolution: fixed/implemented
Crashes QGIS or corrupts data: No	Copied to github as #: 26508
Description	
<p>The alternative layer order (see separate "Layer Order Panel") is broken in QGIS 3 when opening a 2.18 project file.</p> <p>This is not such a well-known, but very powerful feature - one can deliberately reorganize the rendering order in the separate "Layer Order" panel. This is necessary for more complex cartographic output (e.g. cadastral maps).</p> <p>I noticed that an existing 2.18 qgs project opened in 3.0 does two bad things:</p> <ol style="list-style-type: none">1. the checkbox "Control rendering order" in the "Layer Order" panel is set to "off" in QGIS 3, whereas it was on in 2.182. the ordering in the Layer Order panel is completeley mixed up (not as it was in 2.18). <p>I think that this a very important issue to fix for any serious cartographic output involving many layers.</p> <p>I can provide sample data and project.</p>

Applied in changeset commit:qgis|958cb3dd15d22982be90def638d6e871ecbe8e69.

#6 - 2018-04-05 12:10 PM - Alessandro Pasotti

- *Resolution* set to *fixed/implemented*

#7 - 2018-04-05 01:01 PM - Andreas Neumann

Thanks, @elpaso ! - will test with tomorrow's nightly.

#8 - 2018-04-05 02:27 PM - Andreas Neumann

Just tested with self-compiled version (master) and the issue seems to be fixed. Many thanks!

#9 - 2018-04-05 02:41 PM - Alessandro Pasotti

You're welcome! This was a low hanging fruit.
