Pull Request or Patch supplied:	No	**Resolution:**	
Easy fix?:	No	**Copied to github as #:**	26553

Description

In layer styling for labels, in the formatting tab there is the option to wrap multiple lines on a specified character. However, there is not any setting that will display the character that is being wrapped on.

History

#1 - 2019-01-21 12:35 AM - Jürgen Fischer

- Status changed from Open to Feedback

Please test with QGIS 3.4 - QGIS 2.18 reached it's end of life.

#2 - 2019-03-08 11:39 AM - Giovanni Manghi

- Category changed from Unknown to Labelling

- Subject changed from Layer styling labels wrap on character has no way to display character 2.18.18 to Layer styling labels wrap on character has no way to display character

- Tracker changed from Bug report to Feature request

Well... this is technically still valid but... I can't understand the request (not really a bug). The character is displayed... where it is configured (in the "wrap in character" setting), where else it should show?

but not being visible **in**/**on** the label is the whole point of the "wrap on character" configuration.
