QGIS Application - Bug report #18671
Can't export to tiff in layout composer

2018-04-09 03:09 PM - Hugo Santos

Status:	Closed			
Priority:	High			
Assignee:				
Category:	Map Composer/Printing			
Affected QGIS version:	3.0.0	**Regression?:**	Yes	
Operating System:	Linux Mint 18.3	**Easy fix?:**	No	
Pull Request or Patch supplied:		**Resolution:**	invalid	
Crashes QGIS or corrupts data:		**Copied to github as #:**	26559	

Description

Can't export to tiff in layout composer (qgis 3.0.1), like in 2.18. In windows with version 3.0.0 allows the image export to tiff and some other formats.

History

- Status changed from Open to Feedback

Works fine here, and in multiple unit tests. You'll need to provide more info.

- File qgis3_tiff.gif added

- File qgis3.png added

Hi Nyall

I've tested in my machine at work and one of my home pc, both ubuntu based 16.04 (linux mint 18.3, haven't tried in my other one antergos).

QGIS is installed with the ubuntugis-unstable repo's

I've attached a gif and also the image from the about.

Is there any command I can run to give more info?

Thx in advance.

Have you got the qt5-image-formats-plugins package installed?

#5 - 2018-04-10 10:00 AM - Hugo Santos

That's the culprit...installed and everything is like is supposed to be!

I didn't have it installed...weird this dep. didn't get installed!

Many thx!

- Status changed from Feedback to Closed

- Resolution set to invalid

#7 - 2018-06-01 01:56 AM - Stephane Goldstein

I had the same issue recently, in two separate computers running Arch.

qt5-imageformats package wasn't installed as a qgis3 dependency.
