QGIS Application - Bug report #18683
Wrong argument references in aggregate function help

2018-04-10 12:01 PM - Harrissou Santanna

Status:	Open		
Priority:	Normal		
Assignee:			
Category:	Expressions		
Affected QGIS version:	3.1(master)	**Regression?:**	No
Operating System:		**Easy fix?:**	No
Pull Request or Patch supplied:	No	**Resolution:**	
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	26571

Description

In the expression builder, select the aggregate function, the examples at the bottom of the help section use an **expression:=** argument that is not described in the argument section and i feel like there's a misuse in the examples between aggregate, calculation and expression arguments

I think this is true back to (at least) 2.18
