QGIS Application - Bug report #18691
Triggering atlas preview needlessly refreshes map canvas

2018-04-10 03:38 PM - Harrissou Santanna

Status:	Closed		
Priority:	Normal		
Assignee:			
Category:	Map Composer/Printing		
Affected QGIS version:	3.1(master)	**Regression?:**	No
Operating System:		**Easy fix?:**	No
Pull Request or Patch supplied:		**Resolution:**	wontfix
Crashes QGIS or corrupts data:		**Copied to github as #:**	26579

Description

Open a project and add a layout

Place the layout dialog so that you can view the map canvas

Check in the print layout "Generate an atlas" and choose the coverage layer

Enable the preview and press the Next button

The map canvas is refreshed in the background. I don't say that it follows the atlas feature extent; it's just rendered again. If you have labels in the map canvas or some data heavy to render, you'll see that they are cleared and then redrawn (though it's unneeded).

History

#1 - 2018-04-13 01:55 AM - Nyall Dawson

- Resolution set to wontfix

- Status changed from Open to Closed

Actually this is intentional - it's so that any symbology rules which are dependent on atlas feature are correctly applied.
